EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Please change the following typo in Claim 15, Line 1:

The method of claim 13 wherein said ~~said~~ sequence of operations for determining said

2. The following is an examiner's statement of reasons for allowance: Claims 1, 8, and 13 specifically recite that the unknown frequency and phase offsets, which were explained in the specification to mean that a system that does not use preambles for synchronization, are detected for ***Continuous Phase Modulated(CPM)*** signals using all of the following information: "first and second sequences, frequency error estimate, and phase error estimate." In addition, the phase offset was described as using "a first discrete data sample". The prior art failed to teach these features for CPM receivers, especially the phase offset combination of first and second sequences, frequency error estimate, phase error estimate, and ***a first discrete data sample***.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
